OBJECTIVE Senior Gameplay Programmer with 9 years of professional studio experience building core gameplay systems, AI, animation, and multiplayer features in Unreal Engine. Specialized in C++ and Blueprints with proven ability to architect scalable systems for complex games. Extensive experience in gameplay programming, procedural animation, control rigs, behavior trees, and network replication. Strong collaborator focused on delivering polished, performant gameplay experiences.

EXPERIENCE

- + Gameplay, Animation, AI, UI Systems in Unreal Engine (C++ & Blueprints)
- + Tools and Editor Extension Development
- + Publishing on Mobile, PC, and VR Platforms
- + Procedural Animation and Real-Time Systems
- + Network Replication & Performance Debugging
- + Cross-Disciplinary Collaboration and Feature Integration

2021 - 2025

Gameplay Programmer

realworld one GmbH. & Co KG

- + Architected and implemented core multiplayer supported gameplay systems in Blueprints and C++, including AI behaviors, characters, complex systems and interactive mechanics.
- + Owned full feature development cycles from prototyping through optimization, collaborating with design and art teams to deliver polished experiences.
- + Developed tools and workflows that accelerated content creation and enabled fast iteration for developers and designers.

2018 - 2021

Game Programmer

Rigbak Games

Owned complete gameplay architecture and implementation for multiple commercial titles (2M+ downloads, 150k+ paid sales). Managed full development cycle from initial concept through live operations, demonstrating ability to deliver complete projects independently.

Projects: Cover Shooter, Justice Gun 2, Justice Gun

2017 - 2021

Gameplay Programmer

Dreambox Production

Implemented gameplay systems across multiple commercial projects including mobile, VR, and visualization work. Worked primarily in Unreal Engine on diverse game genres and interactive experiences.

- + Dirty Revolver (Mobile): Developed complete third-person shooter gameplay including combat, enemy AI, and progression.
- + Tesseract VR (Steam): Built VR-specific gameplay mechanics, interactions, and performance optimization.
- + Implemented networked gameplay with replication and client-side prediction.

Projects: Dirty Revolver, Tesseract VR

2016 - 2017

Gameplay Programmer

Avrion

Developed combat systems and multiplayer gameplay for Elemental Combat VR. Implemented character abilities, progression systems, and networked gameplay synchronization for competitive VR combat.

Project: Elemental Combat

SKILLS

DEV

- > Gameplay Mechanics & Systems
- > Animation Blueprints
- > AI, Behavior Trees, Navigation
- > UI/UX and HUD Systems

C++

- Ⓢ Unreal Engine Internals
- Ⓢ C++ System Design
- Ⓢ Network Replication
- Ⓢ Memory Profiling

- > Editor Tools & Extensions
- Ⓢ Git, Perforce
- Ⓢ CI/CD (Azure, Github)
- Ⓢ Agile / SCRUM

EDUCATION

Namık Kemal University 2012 - 2016
Bachelor in Computer Science

PROJECTS

Metahuman to Manny Blender Extension 2025

Developed a Blender extension for converting Metahuman rigs to Manny, enabling seamless character retargeting and animation workflows. Designed, implemented, and documented the tool independently.

Catching Breaks 2025

A comedic office management game created for Epic MegaJam 2025. Fix office chaos and put out fires in this quick-time event driven game that captures the "Here we go again" theme. Developed in UE 5.6 with collaboration on character art.

[Project Website](#)

Cover Shooter 2021 →

My most ambitious mobile project - a third-person cover shooter focused on smooth performance and scalability. Built with advanced gameplay systems and optimized for mobile platforms.

[Project Website](#)

Justice Gun 2 2020

A thrilling 3D mobile shooter with outstanding reviews and 50k+ sales. Solo developed, handling all aspects from gameplay programming to publishing.

[Project Website](#)

Dirty Revolver 2019

Western-themed mobile shooter with immersive gameplay. Worked as sole developer with external art support to bring this project to mobile platforms.

[Project Website](#)

Justice Gun 2018

My first solo game - a realistic 3D mobile shooter. This project was my introduction to full-cycle game development, from concept to publishing.
