 PROFILE

Senior Gameplay Programmer with 9+ years of experience building high-performance systems in Unreal Engine 4 and 5. Shipped 8 commercial titles across mobile, VR, and PC, from solo-developed games with 2M+ combined downloads to multiplayer systems in a 6-person studio team. Deep expertise in C++, engine architecture, and Gameplay Ability System. A full-stack game developer who bridges design and engineering, delivering experiences that feel great to play.

 EXPERTISE

+ Gameplay, Animation, AI, UI Systems

+ Tools and Editor Extension Development

+ Publishing on Mobile, PC, and VR Platforms

+ Procedural Animation and Real-Time Systems

+ Network Replication & Performance Debugging

+ Clean Code, Data-Oriented Design & Optimization

 HISTORY

2021 – 2025

Gameplay Programmer

realworld one GmbH. & Co KG

+ Designed and built designer-facing interactive systems in C++ and Blueprints across UE4 and UE5, including dialogue and AI-driven avatar interactions used by the design team to author content without engineering support.

+ Developed custom editor tools that eliminated manual workflows, including an automated icon pipeline and a configurable device builder for interactive machinery setups.

+ Acted as the primary bridge between design and engineering in a 6-person team, leveraging full-stack game development knowledge (animation, rigging, modeling) to rapidly prototype features and unblock cross-discipline collaboration.

+ Owned fast iteration cycles from whiteboard concept through performance profiling, contributing to code quality via technical reviews and shared engineering patterns.

2018 – 2021

Founder & Lead Programmer

Rigbak Games (Independent Studio)

Founded and ran an independent studio, owning complete gameplay architecture and development for 3 commercial titles (2M+ combined downloads, 150k+ paid sales). Managed the full product lifecycle from concept through live operations and storefront publishing.

Projects: [Cover Shooter](#), [Justice Gun 2](#), [Justice Gun](#)

2017 – 2021

Gameplay Programmer (Contract)

Dreambox Production

Contracted across multiple commercial projects spanning mobile, VR, and architectural visualization. Delivered gameplay systems in Unreal Engine across diverse genres and platforms.

+ Dirty Revolver (Mobile): Implemented third-person shooter gameplay, enemy AI behaviors, and combat progression systems.

+ Tesseract VR (Steam): Engineered VR interaction mechanics, spatial gameplay systems, and platform-specific performance optimizations.

+ Developed networked gameplay features with replication and client-side prediction.

Projects: [Dirty Revolver](#), [Tesseract VR](#)

2016 – 2017

Gameplay Programmer

Avrlon

Engineered combat systems and networked multiplayer gameplay for Elemental Combat VR. Implemented character abilities, progression mechanics, and competitive gameplay synchronization for VR.

Project: [Elemental Combat](#)

 SKILLS

DEV

> Gameplay Ability System (GAS)

> Animation Blueprints & Control Rig

> AI, Behavior Trees, StateTree

> CommonUI & MVVM Architecture

C++

 Unreal Engine Source & Modules

 Modern C++ (17/20) Systems

 Replication Graph & Networking

 Memory & Performance Profiling

> Editor Tools & Extensions

 Git, Perforce

> Cross-Team Collaboration

 Agile / SCRUM

EDUCATION

Namık Kemal University 2012 - 2016

Bachelor in Computer Science

PROJECTS

Soulslike Enemy Combat Plugin²⁰²⁵

Published UE5 plugin on Fab marketplace. Production-ready enemy AI featuring tactical positioning, intelligent action selection, and a hybrid StateTree/BehaviorTree architecture designed for extensibility.

[Fab Marketplace](#) • [Project Website](#)

Metahuman to Manny Blender Extension²⁰²⁵

Open-source Blender extension for converting Metahuman rigs to Manny skeleton. Enables seamless character retargeting and animation pipeline workflows between Blender and Unreal Engine.

[Read Article](#)

Catching Breaks²⁰²⁵

Comedic office management game built for Epic MegaJam 2025. Engineered a QTE-driven gameplay framework and event-based state machine architecture in UE 5.6 under 7-day jam constraints.

[Project Website](#)

Cover Shooter²⁰²¹ →

Third-person cover shooter for mobile platforms. Architected scalable gameplay systems with advanced AI, cover mechanics, and performance optimization for mobile hardware constraints.

[Project Website](#)

Justice Gun 2²⁰²⁰

3D mobile shooter with 50k+ paid sales and outstanding reviews. Solo-developed all gameplay systems, AI, progression mechanics, and handled full publishing lifecycle.

[Project Website](#)

Dirty Revolver²⁰¹⁹

Western-themed mobile third-person shooter with 730k+ downloads. Built complete gameplay loop, enemy AI, combat progression, and dynamic weather systems for mobile hardware. Collaboration with external art team.
